## ... IT'S NEVER BEEN EASIER!

 -More than just holding your delicious food, your packaging can help drive additional revenue, build customer loyalty and ensure happy, returning customers.

We offer custom printing on almost all of our products. Print your name, logo, design or color on our products to make them your own.
$\$$ Marketing your brand has never been easier!

## CREATE IMPACTFUL MESSAGES FOR CUSTOMER CONNECTION

1. Customer Convenience: Offer your customers more convenience - Print a bar code for customers to download an online ordering app.
2. Interactive: Entertain your customers while they eat - Print a link to an augmented reality app that makes your package "come to life".
3. Cross Promotion: Offset packaging cost by sharing the message with one of your favorite suppliers
4. Loyalty Programs: Print a code that allows your customers to sign up for rewards like points towards coupons and discounts.
.-- See our Custom Print Program brochure with details for custom color printing on trays, ChampPaks™ and lock corner bakery boxes, all with LOW MINIMUMS!

## SUSTAINABIIJJ']

Look for our sustainability icons on
each product page.

## Our Green Initiative:

Our products are made from paperboard, which is recyclable. Many of our products are compostable in municipal composting facilities. Our goal is to encourage sustainable outcomes for our products. We are continually working to improve our products' environmental impact and educate consumers on living sustainability. The next few pages describe these eco-friendly efforts.

# KNOW THE FACTS 

## 1. PAPER IS A PLANT

Paper is cultivated from trees, grown on tree farms. For every one tree that is harvested from a certified farm, five are planted.

2. PAPER IS INCREASING

Five trees are planted for every one harvested for paper production. This means 1.7 milion trees are planted ever

## 3. PAPER IS RECYCLABLE

Paperboard is the most easily recycled packaging. All paperboard can be recycled together, as opposed to recycling different grades of plastic or glass.*

## 4. PAPER IS RESPONSIBLE

Paperboard packaging reduces waste in landfills and toxic materials in the manufacturing process.
I

## Recyclable

Recycling converts manufactured waste into a new use by breaking down the product into raw materials and reusing them to create something new or different. Less energy goes into creating products made from recycled materials rather than new materials being used for the first time.**
5. PAPER IS FUEL

When its recyclability has been exhausted, paper can be used as a fuel source.

[^0]

## OUR MATERALS

 We carefully monitor the use of materials at every stage of our manufacturing process. From concept to finished goods, we create products based on the needs of your item, while keeping in mind the environmental effects of our processes and materials. We provide The Complete Package ${ }^{\text {TM }}$ for you.

From beginning to end, paperboard packaging is among the most environmentally friendly resources.

Paperboard packaging reduces waste in landfills and toxic materials in the manufacturing process. The trees that are used to make paper are crops, grown in certified tree farms where they are planted, harvested, and replanted for use in packaging, paper, and other disposable products.

- Almost all paperboard comes from certified farms which plant, harvest, and replant trees specifically for the paper industry.
- For every tree harvested from a managed tree farm, five more are planted.
- There are 1.7 million trees planted every day!

## OUR PROCESS

*Mansfield plant only

Our ChampWare ${ }^{\text {TM }}$ products are BPI certified, meaning they have passed extensive environmental testing for biodegradation, disintegration, and phytotoxicity.

Over 200 of our stock products are Cedar Grove Accepted, meaning they are composed of straight paper or wood fiber, have passed ASTM D6400 or ASTM D6868 standards of biodegradability, or pass a substrate technical review or field disintegration test.

This agreement with Customs and Border Protections identifies our products as low risk and reduces time to ship internationally.

Our products meet requirements for LEED (Leadership in Energy and Environmental Design) consumables to help you meet your point targets for sustainability.
The BRC Global Standard for Packaging and Packaging Materials is the first Packaging Standard in the world to be recognized by the Global Food Safety Initiative (GSFI) benchmarking committee. It's why over 3,500 suppliers in over 80 countries have chosen to be certificated to this scheme and is recommended or accepted by specifiers worldwide. The BRC Packaging Standard is used by any manufacturer producing packaging materials for all types of products - from food to consumer products - at all levels: primary, secondary and tertiary.

The International Organization for Standardization certifies that each of our processes, systems, and procedures meet the requirements for standardization and quality assurance.

With a G7 Master Printer Certification, we provide consistent color matching with each production run.

# QUALITY PROTECTION BRANDING... 

Paperboard comes in many different board types with various surfaces, characteristics and colors. Use this guide to help determine the best paperboard for your product!

## CCK - Clay Coated Kraft

Virgin paperboard that is not bleached. Has one white side, that has been clay coated for durability and printability, and a Kraft brown side. Also known as Coated Unbleached Kraft (CUK).

## CRB - Coated Recycle Board

Produced with $100 \%$ recycled paperboard. Has one white side, that has been clay coated for durability and printability, and an unbleached side. Also known as Clay Coated Recycle Board (CCRB).

## Kraft

Made from virgin, unbleached paperboard. Brown on both sides.

## SBS - Solid Bleached Sulfate

Premium paperboard produced with virgin bleached wood pulp.
White on both sides. Typically clay-coated for added durability and printability.

## URB - Uncoated Recycle Board

Uncoated board made from recycled paper, usually brown in color. Generally contains post consumer waste. Also known as Bending Chipboard (BC).
