89%
reduction in total utility spend

Utility Spend
per night

Utility savings calculated using national average water, energy, and gas costs provided by federal and state agencies. Estimated 42% of stores use electric heaters based on survey of 500 stores. Costs assume heating water from 60°F to 120°F for traditional system, and no water heating using LmENTARY. Water savings calculated based on 16 stores from two major food retailers in different states on the LmENTARY program, one previously using a wash-rinse floor cleaning SOP and another previously using a wash-rinse-sanitize floor cleaning SOP.

PRODUCT	ITEM #	PACK SIZE
 LmENTARY No-Rinse Drain & Floor Cleaner Sanitizer	Item #: 1110259	1 x 2.5 gal.
 Green Dual Surface Deck Brush (available in other colors)	Item #: 92222683	1 ea
 Green 22" Foam Floor Squeegee (available in other colors)	Item #: 92222684	1 ea
 54" Aluminum Universal Handle (for deck brush/floor squeegee)	Item #: 89990155	1 ea

LmENTARY Program Combating *Listeria* made simple.

- ▲ Does the job of 4 products today, cutting steps for floor and drain sanitization in half.
- ▲ Proven to reduce *Listeria monocytogenes* in real world retail delis¹.
- ▲ Proven to increase deli floor cleanliness and coefficient of friction².
- ▲ Proven to save valuable labor, water, and energy³.

Delivers cleaner floors and drains at a lower total cost to retailers.

The LmENTARY Program consists of LmENTARY No-Rinse Cleaner Sanitizer, training materials, and proprietary dispensing technology.

COMBATING Listeria doesn't need to be complicated.

Listeria monocytogenes is a critical challenge faced by retailers today. Replace today's complicated process for combating Listeria with a simpler, easier to execute program.

LmENTARY makes it *easy*...

50% fewer steps

LmENTARY Program Proven to Combat *Listeria* in Real World Deli Environments¹

Weeks to Reducing Listeria Below Detectable Levels

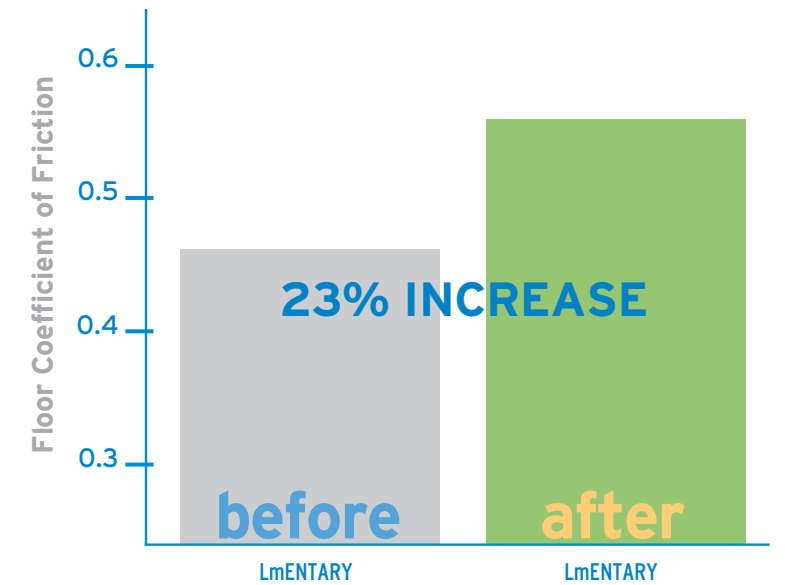

Studies show **60%** of retail delis are positive for Listeria. Listeria was *reduced* BELOW detectable levels within 8 weeks due to the simplicity of the program.

Prior to installing the LmENTARY program, swabs were taken in retail delis. The swab sites chosen are common harborage points for *Listeria monocytogenes*. Results confirmed *Listeria* spp. was reduced below detectable levels in all locations within 8 weeks.

Detailed microbiological report available upon request.

LmENTARY Program Proven to Improve Real World Deli Floor Cleanliness²

The LmENTARY chemistry is specially formulated to target the soils in retail delis and break them down over time for improved cleanliness. To evaluate the impact LmENTARY has on floor coefficient of friction, stores using different SOPs and cleaning products were chosen. LmENTARY successfully improved COF with each retailer with the store average going from 0.46 to 0.56. 2 stores with pre-test COF averages below the ANSI low slip resistance standard of 0.30, improved from an average of 0.27 to 0.52 by the conclusion of the test, a 93% improvement.
