Sustainable Solutions

Ocean Plastic

Hippo Sak®

Made with recycled plastic collected off beaches in third world countries before it gets into the ocean

Made with a minimum 20% Recycled Ocean Plastic material:

Recycled Ocean Plastic is plastic collected from third world coastal countries that are major contributors to our ocean pollution problem.

- As large quantities of plastic needs to be collected, this effort has created new jobs for over 9,000 people in countries of Haiti and Mexico. By collecting one "Super Sack" full of plastic, they are able to make enough to feed a family of 4 for 1 month!
- 100% Recyclable
- Made in USA

Turn the Tide
on ocean pollution & poverty
